

Create a collection by the name `blogPosts` and it has 3 fields `id`, `title` and `comments`.
 In the collection the `comments` field is an array which consists of user details. Each collection consists of two user details inside the `comments` array- `user name` and `text`
 Demonstrate the following

1. Adding an element into array
2. Display second element
3. Display size of the array
4. Display first two elements of the array
5. Update the document with `id` 4 and replace the element present in 1st index position of the array with another array
